## **CONTINUING EDUCATION**

My profession is continually changing and the only way I feel comfortable providing the highest quality of service is by continually attending postgraduate continuing education courses. Since graduating in 1991, I have averaged over 100 hours of continuing dental education per year. The excitement of training has increased as time passes.

Below is a sample of some of the 1500+ hours of postgraduate continuing education courses, which I have taken over the past 14 years.

### **INTERESTS AND ACTIVITIES**

In my downtime I enjoy a wide range of activities, from white water rafting and mountain biking to creating new pieces of art and jewelry for family and friends. For the past sixteen years, I have been researching and writing an historical fiction novel based on Renaissance Spain. I hope to have it completed before my 40<sup>th</sup> birthday. My favorite time is spent with my wife Alisa and my three sons, Daniel, Yoni and Avi.
